

The CoDeSys installation package includes a tool for Target installation.

The tool is called “Install Target” and can be used both for checking the installed target support packages and for installing new ones. To install the SCM Target Support Package just click “Open” and locate in the hard disk the file with extension “.tnf” that was supplied with the zip package. The target tool does the rest of the installation automatically.

The Install Target tool can be found in the CoDeSys program group that you will find in the Start Menu after the installation of the software.

The Target configuration for SCM03-C modules is called:
EXOR/SITEK CoDeSys for SCM03 (eCos/Mips)

The Target configuration for SCM11-C, SCM05-C and SCM12-C modules is called:
EXOR/SITEK CoDeSys for SCM1x and SCM05 (eCos/Mips)

The Target configuration for JMobile units series 400 is called:
EXOR/SITEK CoDeSys for JMobileWCE (WCE/MIPS)

The Target configuration for JMobile units series 500 (504, 506 and 507) is called:
EXOR/SITEK CoDeSys for JMobileWCE (WCE/ARM UN31)

The Target configuration for JMobile units series 500 (other than 504, 506 and 507) is called:
EXOR/SITEK CoDeSys for JMobileWCE (WCE/ARM UN30)

The Install Target tool is shown in the following figure.
